Real Patients, Real Results

ACNE VULGARIS

BEFORE

AFTER: DAY 30

Photograph taken by professional on mobile phone

What the patient said...

“ Before I started the treatment the spots on my back were very angry and were generally out of control. I also had a lot of big boil type spots and skin bumps under my skin and jaw line on my face.

These spots have completely cleared up under my skin as I started using the same homecare products Gemma prescribed me for my back on my face. The homecare wash “Clarifying Acne cleanser” has also had a huge improvement on my back and chest as I had breakouts there too. Although I still get spots my skin is a lot clearer and feels more hydrated.

After having my 4th peel on my back the Acne has reduced by 70% and the scarring has faded. A few nasty ones are still coming through but it's all a lot less angry and it feels less sore to sit on a chair and rest. ”
